

Home Inspection App

Our client's app lets people create Comprehensive Home Inspection Reports using their iPads.

Generate on-the-spot detailed narrative reports.

Capture and organize inspection pictures with issues/comments right with them.

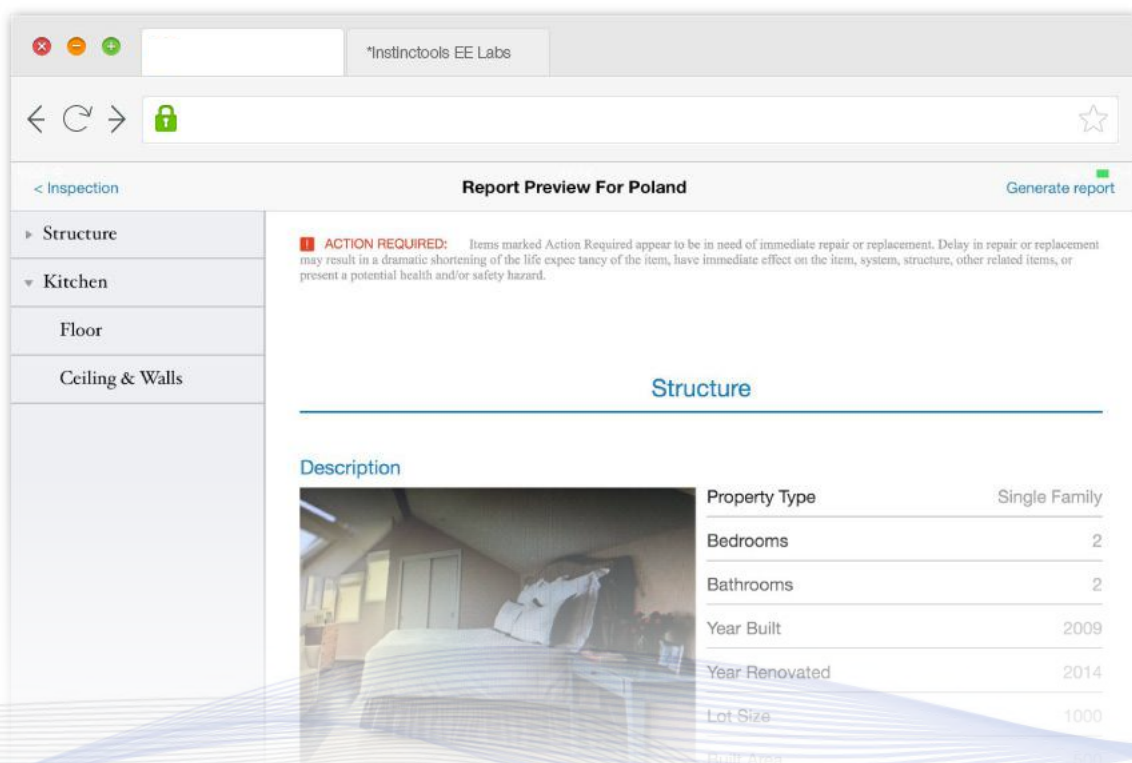

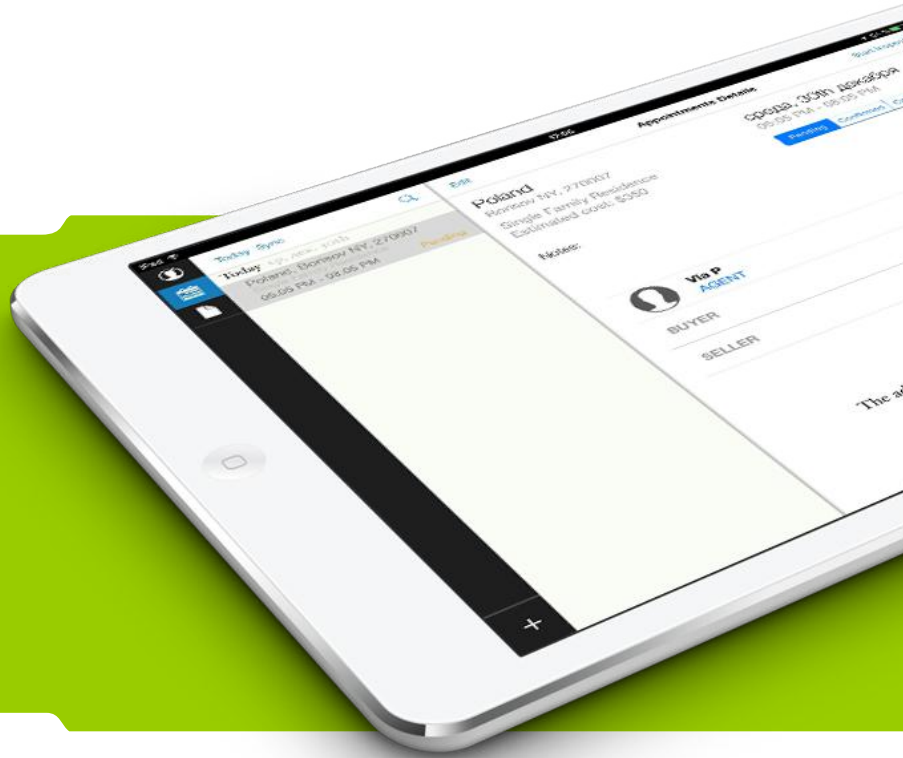

Receive payment, print and share the reports right from the app.

Vizispect is an iOS client for home and apartment inspections in the USA. The inspector fills in the report on an iOS device and then the application presents the report in HTML and PDF formats.

Challenge

- Creation of HTML report with use of CSS styles, navigation via native UI components
- Creation of PDF report with content, pagination and navigation via content
- Native UI for the viewing page of data collected (UI for reports screens)

Key Features

Generate on-the-spot detailed narrative reports

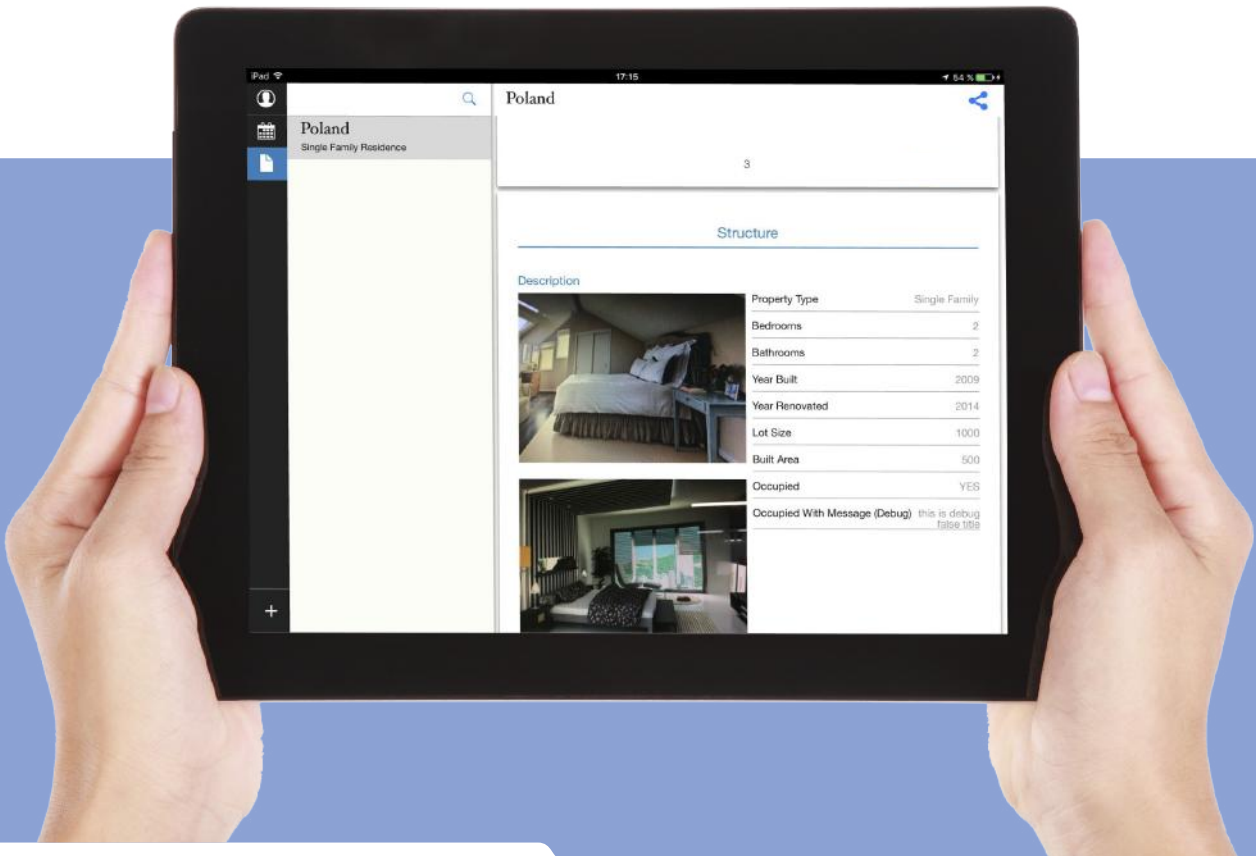

Receive payment and print

Capture and organize inspection pictures with issues/comments right with them

Share the reports right from the app

Technologies Used

UIKit

QuartzCore
