E-Builder App For a Construction Company

e-Builder ®
A TRIMBLE COMPANY

How replacing a 15-year-old construction program management software with a user-friendly e-builder enabled an international construction company to overcome performance issues and **triple** employees' productivity.

About the project

In modern digital world every construction company has its own software that helps manage all details related to project management, job estimating, materials takeoffs and other issues. Our client has been working with **Construction Program Management Software** for almost 15 years already. During this time the company developed and modernized the Software according to their growing needs and working potential. As a result they faced some problems connected with optimization of their software and integration with new modules.

Challenge

The team was aimed to not only fix bugs in the software, but provide smooth operation and make integration of different modules possible. In this regard the work was divided into several parts:
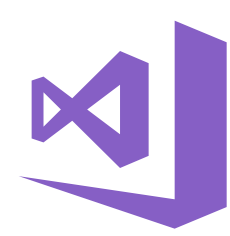

Fixing bugs and testing

Optimization of system processes

Prevention of possible errors and disruptions

Solution

As a result of effective cooperation between the *instinctools team and the client we've got an improved product with **smooth operation, fixed bugs and streamlined system**. As well our professionals hold a consultation with onsite tech team on identifying special aspects of system behaviour and any potential problems.

Technologies

Visual Basic

MS SQL
