

MOBILE DIALOGUE PLATFORM

This mobile dialogue platform is created to stay connected with employees, brief and train them remotely, engage them to give a feedback and be involved in positive change.

Remote briefing and training service

Lack of two-way conversation between head office and the shop floor is bad for business. Staff should be always engaged with personalised, relevant information. Such engagement motivates staff by defining their role in product launches.

To cover all enterprise levels business needs solution should

- Broadcast targets to end point employee
- Track their reaction and feedback in real-time
- Broadcast work/decision results to all team/company members
- Be reachable everywhere
- Have support for pep talks

Challenge

- Solution should be cross platform and work on enormous device models in the same manner
- Solution should be available 24/7
- No downtimes is allowed
- High load expected

Solution

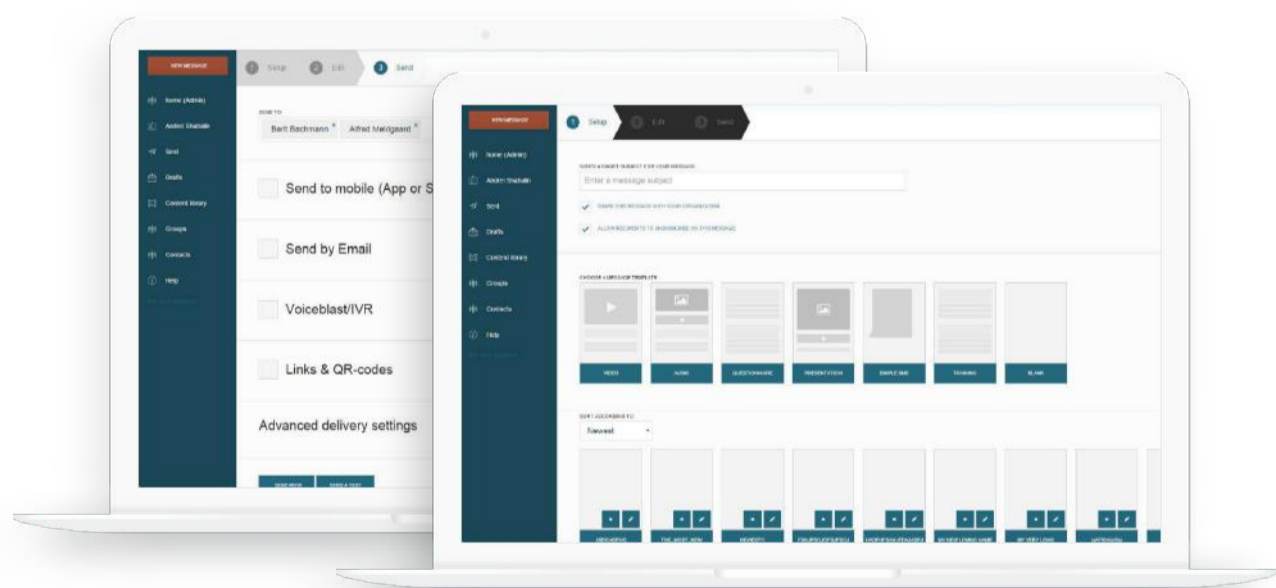

Node.js as main platform

Advanced caching with redis

Clustering

Technologies

PHP

NodeJs

Angular

Python

MySQL
